# Zhejiang Dingli Machinery Co., Ltd.

# Biodiversity Conservation Policy

## 1.Overview

Zhejiang Dingli Machinery Co., Ltd. (hereinafter referred to as 'the Company' or 'we') adheres to the principle of avoiding environmental impacts at the source and deepening process management. We are committed to safeguarding ecosystem integrity and biodiversity, and to minimizing interference and damage to ecosystems in our production and business operations.

## 2. Statement and Commitment

The Company integrates ecological protection concepts throughout the entire lifecycle of engineering projects. We explicitly require that biodiversity conservation be considered during project development, construction, and operational activities, aiming to minimize the environmental, natural resource, and biodiversity impacts of production and operations, promoting harmonious coexistence between society and nature. Our commitments include:

(1)Complying with ecological and environmental protection laws, regulations, and standards applicable to the countries (regions) where projects are located, and operating in accordance with the law.

(2)Avoiding operations near locations with globally or nationally significant biodiversity.

(3)Establishing and implementing effective biodiversity conservation goals, plans, and measures to reduce adverse environmental impacts.

(4)Promoting and adhering to biodiversity conservation principles within the supply chain, and participating in or initiating biodiversity conservation actions.

(5)Establishing effective communication and consultation mechanisms with internal and external stakeholders.

(6)Continuously improving and proactively disclosing biodiversity conservation performance, accepting supervision from investors and the public.

## 3. Scope of Application

This policy applies to all personnel of the Company and its subsidiaries (including board members and senior management), and actively encourages related contractors, suppliers, subcontractors, partners, and their permanent or temporary employees providing services to the Company to implement it.

## 4. Measures

To fulfill the above commitments, we will undertake the following measures:

(1)Strictly comply with domestic and international laws and regulations such as *the Environmental Impact Assessment Law of the People's Republic of China* and *the*

*Environmental Protection Management Regulations for Construction Projects*, and actively respond to international initiatives such as *the Convention on Biological Diversity*.

(2)Set phased ecological and environmental protection targets in line with the Company's business development.

(3)Strive to maintain and promote biodiversity through sustainable land management and conservation.

(4)Focus on protecting ecosystems (wetlands, wildlife corridors, protected areas, and agricultural land), avoid activities in nature reserves, ecological redlines, and other sensitive areas; protect rare flora and fauna and their natural habitats.

(5)Save and intensively use land, minimize land disturbance, effectively manage land resources, and formulate and adjust ecological restoration plans in a timely manner.

(6)Prohibit deforestation; any deforestation conducted before policy establishment shall be compensated by future reforestation to ensure no ongoing deforestation in our business operations.

(7)Regularly conduct biodiversity conservation training for employees, and organize biodiversity awareness lectures and public welfare activities such as tree planting.

## 5. Supplementary Provisions

(1)This policy has been reviewed and approved by the Board's Strategy and ESG Committee and senior management, ensuring its alignment with our ESG strategy.

(2)The Board's Strategy and ESG Committee regularly reviews biodiversity conservation policies and performance to ensure implementation and supervision.
